

QUALITY AND ENVIRONMENTAL PROTECTION POLICY

Here at BSG Sp. z o.o., we aim mainly for development by retaining our customers and winning new ones and for constant expansion of our offerings:

polyurethane adhesives and sport surface systems produced by us.

Thanks to their high quality, the products offered by BSG Sp. z o.o. systematically find increasing use in the construction of sport, leisure and industrial facilities and single-family housing, as well as in rubber and flexible polyurethane foam recycling technologies.

The required quality is ensured by:

- commitment to order processing in accordance with customer requirements,
- implementation and maintenance of the Integrated Administration System for a better work organisation improving satisfaction of our Customers,
- protecting the natural and work environment, including ensuring safety and efficient infrastructure,
- continuous improvement of the Integrated Administration System's effectiveness.

We determine high demands for ourselves, and improve our skills creating favourable conditions for enhancing the organisation management.

High quality serves as a means of achieving the strategic goal, that is positive financial result and market competitiveness. The executives undertake to continuously upgrade the Integrated Administration System compliant with PN-EN ISO 9001:2015-10 and PN-EN ISO 14001:2015 standards, provide funds necessary for its normal operation, and meet the applicable requisites.
